

EMILY  
ZIZ

## PRINTED ACOUSTIC PANELS

Enhance your environment with our decorative print  
on demand acoustic solutions.  
Combine bespoke design with sound control.

*Design + Function*

Select any designs from the Emily Ziz Print Catalogue for print and supply onto a range of acoustic panel products. In addition to using one of the Emily Ziz print patterns we can also print your custom graphics or develop unique artwork for you.

We will work with you to determine the most suitable acoustic substrate of your project.

Typically we print and supply the Woven Image Echo Panel, Autex Cube and Acoustic Interiors Australia products (12mm or 24mm substrates). If there is a another acoustic product that you would prefer to specify, please talk to us and we can work through this option with you.

We can supply the full standard sheet sizes (commonly 1200mm x 2400mm) or we can supply the panels cut to size as required for the project.

For curved walls we can print on thinner substrates such as the Woven Image Mura product.

Where multiple panels connect to one another the artwork is set up to allow for the seamless installation of the pattern to enable the panels to pattern match.

Common applications: pinboards, work station partitions, acoustic boards, artwork, wall paneling
