

Ronel Jordaan™

Ronél Jordaan is inspired by nature. Through the medium of felted wool, her original designs playfully and eloquently echo organic forms and textures. These elements infuse a home with the comforting serenity, purity and beauty of the outdoors. In a conscious effort to alleviate unemployment among woman living in the city townships, the company is dedicated to transference of skills, eco-friendly processes and celebration of respect for the environment.

Professional

- It is our recommendation that the professional treatment be purchased if the rock cushions or seating products are going to be in any high traffic area such as: Reception Area, Hotel, Lodge, Children's Play Area, Lounge etc.
- Our professional finish is 100% water resistant and can be used outdoors in areas such as: Pool decks, Patio's, Outside seating areas.
- Our professional finish is 100% weather resistant and can be left out in ALL weather conditions including snow.
- The finish we have developed is an eco friendly hydrophobic treatment that repels liquid. It also prevents 'pilling' which is inherent in any wool product.
- The professional treatment is very easy to keep clean, just wipe with a damp cloth or if very dirty, follow our cleaning instructions.
- The finish does give the wool a rougher texture but does not alter the look or colour of the product in any way.
- Please take note of our care instructions for the longevity of your wool product.

Standard

- Our standard finish products are treated with the same finish, just to a lesser degree.
- The treatment will also prevent pilling, however, it is important to remember that the standard finish products are more for decorative purposes and occasional seating.
- They are softer to the touch than the professional range.
- Please follow our cleaning and care instructions for the longevity of your wool product.

Special Care

All our pieces are hand made from 100% Merino wool, as wool is an organic fabric it is important to take special care for the longevity of your product.

Please take note of the care & cleaning instructions to best assist with a lifetime of happiness from your wool product.

Product Longevity

- Do not put your product on an abrasive surface.
- Turn over your product on a regular basis to avoid, moisture build up underneath, dust mites & insects.
- Dust and clean your product regularly as you would with a couch cushion.
- It is very important to vacuum your product on a regular basis.
- Spray product with a lavender mist or insecticide every 3 months.
- Felt lavender mist is available for purchase from us, please enquire.

Cleaning

Dry Clean or

1. Wash with a soapy sponge & luke warm water
2. Rinse well with a vinegar & luke warm water solution
3. Dry out in the sun
4. Spray with lavender mist
5. Please do not use hot water as wool will shrink

If your product is able to fit in your washing machine, select the 'wool' cycle and wash as normal.
