## TEST REPORT

**CEZANNE  
BASE CLOTH**

TEST NUMBER : 7-597693-BN  
ISSUE DATE : 02/06/2014  
PRINT DATE : 02/06/2014  
ORDER NUMBER : 27534

SAMPLE DESCRIPTION Printed chennille fabric  
Nominal Composition: 100% Polyester  
Nominal Thickness: 450g/m2

AS 1530.2-1993 Test for Flammability of Materials

DATE TESTED: Flammability Index: 3 Range 0 - 100 for most material

02/06/2014

	Length	Width
Spread Factor: Range 0 - 40	2	1
Heat Factor: Range 0 - upward	1	1
	Length	Width
Maximum height (d) mean	4.1	3.5
cv	29.0	32.7 %
Time (t) mean	N/A	N/A s
cv	N/A	N/A %
Heat (a) mean	3.9	2.6 degC min
cv	46.4	59.6 %
No of specimens tested	9	9

These test results relate only to the behaviour of the test specimens of the material under the particular conditions of the test, and they are not intended to be the sole criterion for assessing the potential fire hazard of the material in use

### SAMPLE DESCRIPTION

Printed Chennille fabric  
Colour: Multicolour  
Approx thickness: 1mm  
End Use: Upholstery

THESE RESULTS MUST BE CONSIDERED IN CONJUNCTION  
WITH THE COMMENTS ON THE FOLLOWING PAGE(S)

Material Specification provided by client:  
Nominal composition: 100% Polyester  
Nominal mass: 450g/m2

AS/NZS 1530.3 - 1999 Simultaneous determination of Ignitability, Flame  
Propagation, Heat Release and Smoke Release

### RESULTS:

Face tested: Face

Date tested: 30/06/2014

	Mean		Standard Error
Ignition time	9.13	min	0.23
Flame propagation time	Nil	s	Nil
Heat release integral	43.0	kJ/m2	2.5
Smoke release, log d	-0.8866		0.0308
Optical density, d	0.1315	/m	

Number of specimens ignited: 6

Number of specimens tested: 6

REGULATORY INDICES:		
Ignitability Index	11	Range 0-20
Spread of Flame Index	0	Range 0-10
Heat Evolved Index	1	Range 0-10
Smoke Developed Index	5	Range 0-10

PRINT DATE : 01/07/2014  
ORDER NUMBER : 27534

### Comments:

These results only apply to the specimen mounted, as described in this report.

The results of this fire test may be used to directly assess fire hazard, but it should be recognized that a single test method will not provide a full assessment of fire hazard under all fire conditions.

The reaction of thin unsupported flexible materials to flame impingement can be assessed in accordance with AS 1530.2. Where materials of thickness less than 2mm that are sufficiently flexible to be bent by hand around a mandrel of 2mm diameter or less are subjected to the test described herein, they should also be subjected to the test in AS 1530.2.

Each test specimen had an unattached backing of 4.5mm thick fibre reinforced cement board.

The specimens melted away from the area of maximum heat and produced flaming droplets during the test. Due to this phenomena it should be recognised that this test result may not be a true indication of the product's fire hazard properties.

The specimens melted and flowed away from the area of maximum heat during the test. Due to this phenomena, it should be recognised that this test result may not be a true indication of the product's fire hazard properties.

Specimens tended to flash before ignition. Ignition was based on the occurrence of a single flash of flame which lasted longer than 10 seconds.

Each test specimen was restrained on the exposed face by a layer of galvanised welded square mesh made from wire of nominal diameter 0.8mm and nominal spacing 12mm in both directions and securely fixed to a backing board at four points each 100mm from the centre of the sample and the assembly clamped in four places.

To allow free movement of sample during testing all corners were folded away from the clamps.
